

# Muse-Score Project

## Lesson-3

### Motif

A musical composition is like an organism that consists of cells. Every organism first develops from a stem cell that grows and as it grows many cells specialize from stem cell to the cells that form parts of our body and organs. In music we call a cell a ***motif***. A motif is a short musical idea in a composition that has a recognition value. A motif can be one, two or seldom four or more Measures/bars long.

### Assignment-3:

Compose several motifs that are one to two bars/measures long and select the one you like most.

### What to Submit:

Save the motif you like best as a \*.mscz file (Musescore format) and export it as a \*.pdf file on your computer in your Musescore Folder. Upload the \*.pdf file into your personal "Google Classroom Folder".
